TITLE : PROGRAM SPECIFICATION
PREPARATION SYSTEM

ABSTRACT : PURPOSE: To provide a program specification preparation system for making prepared parts data capable of being shared among plural humans and easily performing editing operations such as the updating and deletion, etc., of the parts data.

CONSTITUTION: In this program specification preparation system, plural program specification preparation devices 100A-100C and a server 110 provided with a storage device 112 for sharing plural program specifications as the parts data are connected by a network 120. The program specification preparation devices 100A-100C display the program specifications and the parts data, etc., retrieve the desired parts data from the plural parts data stored in the server 110, define information for preparing the new program specifications, combine the retrieved plural parts data based on the defined program specification preparation information and assemble the new program specifications.
